Raizer is a mobile lifting chair that helps people who have fallen on the floor to get up again in just a few minutes. Raizer can be operated by a single assistant and requires only limited physical effort beyond the help of a supportive hand.
Raizer can be operated by one person

- Raizer gives you more freedom and independence, allowing you to get up with the help of one person, such as a relative.
- If a relative is there to assist a person using Raizer, the person can become more independent and stay at home for longer.
- A family member can help with the lifting, so there is no need for any outside help.
- It usually requires two people to lift a person from the floor, but Raizer requires the help of only one person.

- Fast and easy assembly (3 min.) close to the person on the floor.
- Lifting using Raizer requires only a minimum of physical effort.
- Being lifted by Raizer is very pleasant and secure.
- The lifting process is ergonomically correct and no belts or straps are needed.
Minimal manual handling

- Compact storage.
- Can be carried in cars, boats, on a bicycle, to your holiday cabin, etc.
- Raizer is easy to transport packed in two bags.
- Easy to operate in a confined space.
- Easy to disassemble after use.
- Easy to clean and disinfect.
- Fast and easy disassembly and packing (2 min.)
• The Raizer design has colour codes that ensure fast assembly and disassembly.
• Extra equipment such as a trolley (with stair wheels), a bike bracket and connectable remote control.
• Raizer can be used outdoors on all solid surfaces.
• Durable materials ensure a long lifetime.

Contact your distributor for more information relevant to your situation and needs.

• Registered design.
Equal opportunities for all

Liftup designs and develops welfare technology aids based on our values of dignity, safety and equal opportunity for all. As a professional helper, you will see that Raizer ensures stability and safety, and also helps you save time, maintain a healthy working posture, and protects you from overexertion.

At Liftup our principle is to work continually with the innovative development of welfare technology products. Liftup was founded in 2003, and is a wholly privately-owned Danish enterprise.

Aesthetics, design and safety are essential in everything we do within the field of welfare technology. We don’t make machines, we offer welfare aids that safeguard the dignity of their users.
